

Party Playlists and Mood Tunes

DON'T HOST A PARTY, HOST A MEMORY.

Music is a must at any party. Music can inspire, calm, excite, change or even create the mood of an event. Lucky for us, the iPod allows us to create party playlists in a flash. And, if you don't have an iPod, Mermaids put together a few compilation CD suggestions too! **A Mermaid tip on selecting mood tunes:** When you begin to compile your guest list—next to the name of the guest—jot down a song inspired by that guest. It should be the first song you think of when you think of that person, or maybe there is a song that has always reminded you of them or you know is their personal favorite. Everyone at your event will appreciate the dedications!
